

Project Development Phase

Coding & Solution

Date	10/07/2026
Name	Vakade Kishor
Project Name	Credit Card Approval Prediction
Maximum Marks	5 Marks

Functional Features Overview:

This document lists all the functional features implemented in the **Credit Card Approval Prediction** project. Each feature contributes to building an intelligent system that predicts whether a credit card application should be approved based on applicant information using machine learning techniques.

S.No	Feature Name	Feature Description	Module / Component	Status (Done / In Progress / Pending)	Marks Contribution
1	Data Collection	Import and load the credit card application dataset.	Data Module	Done	High
2	Data Preprocessing	Handle missing values, encode categorical features, and normalize data.	Preprocessing Module	Done	High
3	Feature Engineering	Select relevant features and prepare data for model training.	Feature Engineering	Done	Medium
4	Model Training	Train machine learning models such as Logistic Regression and Random Forest.	ML Model	Done	High
5	Credit Card Approval Prediction	Predict whether a customer's application will be approved or rejected.	Prediction Module	Done	High
6	Model Evaluation	Evaluate performance using Accuracy, Precision, Recall, F1-Score, and	Evaluation Module	Done	Medium

		ROC-AUC.			
7	User Interface	Allow users to input applicant details and receive prediction results.	Flask Web Application	Done	High
8	Result Display	Display prediction outcome with confidence and user-friendly messages.	Output Module	Done	Medium

Feature Summary:

Metric	Count / Value
Total Features Planned	8
Total Features Implemented	8
Core / Must-Have Features	6
Additional / Nice-to-Have Features	2
Features Tested & Verified	8

Feature Category Breakdown:

S.No	Category	Features in Category	Example Features
1	User Interface (UI)	2	Applicant details form, Prediction result page
2	Backend / Logic	4	Data preprocessing, Feature engineering, Model training, Prediction engine
3	Database / Storage	1	Dataset loading, Saved ML model (Joblib/Pickle)
4	API / Integration	1	Flask backend connecting UI with prediction model
5	Security / Authentication	0	Not applicable for the current project
